- 125/125 - Project proposal and description
- 35/35 - Code layout and organization
- 50/50 - Algorithm / methods
- 50/50 - CGI/template coding
- 36/36 - HTML5 markup
- 40/40 - Database design / utilization
- 40/40 - User interface

Total: 376/376 points

NOTES

=====

Your write-up for this, along with the accompanying discussion and README was quite good.

Your code layout was good and your schema worked for this project.

This sort of project is a good review though of the technology layers we've used in class. I hope you found it useful.

Very well done overall!
